

ANSH SHARMA

ML Engineer | Data Scientist

+91 8368065604 | Delhi, India

anshsharma2903@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#).

SUMMARY

MCA Graduate with experience in data analytics, machine learning, NLP, and data engineering. Experienced with Python, SQL, and modern data and ML tools, with hands-on work in data pipelines, machine learning models, and research-oriented applications.

EXPERIENCE

Data Analyst Intern – iTech Mission Pvt. Ltd

Aug 2026 – Present

- Validate data modules and workflows, tracing inconsistencies between frontend inputs and backend processing; identify type/format issues and recommend concrete validation checks.
- Support dataset retrieval, cleanup and verification using Excel, SQL and Python; collaborate with the team to confirm fixes and maintain data quality before release.

PROJECTS

Spore - Local-First Data Platform | [WEB-PAGE](#) | [GITHUB](#)

Aug 2025 – June 2026

- Designed and built an open-source local-first **data platform** integrating multi-source connectivity, SQL analysis, local data materialization, Python notebooks, dashboards and LLM-assisted workflows; **570+ Docker Hub pulls**.
- Engineered the analytical data layer for memory-efficient processing of local and remote sources, using batching, Arrow/ADBC, DuckDB and Parquet for data transfer and local materialization; **validated on a 6.7 GB (~8M-row) dataset**.
- Built Docker-sandboxed Jupyter execution, configurable Python runtimes, schema/metadata inspection, session-backed connections, local/cloud model integration and interactive visualization/reporting, creating a reusable environment for data and ML experimentation.

XLm-V Tuktuk HIEN LID – Token-level LID model | [GITHUB](#) | [HUGGING FACE](#)

June 2026 – July 2026

- Addressed a scarce NLP sub-problem, token-level language identification on code-mixed Hinglish social text building the **data and labeling pipeline in Spore** from ~30k Roman-script social comments through cleaning, auditing and token-level pseudo-label generation. **Achieved 80+ Hugging Face downloads**.
- Combined 3 labeling sources through **ensemble voting across ~456k tokens** (Fleiss' $\kappa \approx 0.65$), then fine-tuned facebook/xlm-v-base for token classification on a single Kaggle T4.
- Evaluated against existing LID models and the external **LINCE benchmark**, achieving **0.87 macro F1** and performance within 0.01 macro F1 of cited specialist baselines.

RESEARCH EXPERIENCE

Applied NLP & Data Mining Research

June 2025 – Jan 2026

- Collected and prepared 20k+ code-mixed Hinglish records from Reddit, Twitter, Facebook, Instagram and YouTube using APIs, public endpoints and Selenium/Selenium-Stealth; contributed annotation and pipeline optimization using Excel and Label Studio.
- Progressed from annotation to independent data-collection and methodology work; mentored 4 MCA/M.Tech students across institutions on data-collection practices and routing/annotation workflows.
- Contributed to an ongoing Springer LRE research manuscript and received named acknowledgement for project contributions; manuscript is currently under review.

SKILLS

Languages: Python, SQL

ML/Data: Scikit-learn, Pandas, NumPy, PyTorch, Transformers

LLM/NLP: Hugging Face, Ollama, LM Studio, NLTK, LangChain

Infra: Docker, Flask, Git, Google Cloud, Azure

Databases: PostgreSQL, MongoDB, Supabase, Redis

EDUCATION

Master of Computer Applications

Guru Gobind Singh Indraprastha University, Jagan Institute of Management Studies
New Delhi

8.1 CGPA

08/2024 – 07/2026

Bachelor of Computer Application

Guru Gobind Singh Indraprastha University, Maharaja Surajmal Institute
New Delhi

7.9 CGPA

11/2021 - 07/2024
